

They're having a Monster summer at [Saskatchewan Science Center](#), in Regina, Canada. They've extended their opening hours to cater to the crowds and are staging monster making holiday camps, all day sculpting activities and heaps of other cool stuff.

To take a 'behind the scenes' peek at the exhibition in situ click [HERE](#)

Engage audiences aged 4-84 at your venue with this fun, informative and interactive exhibition.

'How to Make a Monster - the art and technology of animatronics'
has proven to be a Top 3 exhibition at every host venue - Number 1 at most!!!!

Exploring Science, Technology, Engineering, Art and Math
in a creative, hands on environment, this is the school excursion
kids talk about for years to come!

They'll get to direct a dinosaur, manouver mermaid tails, move a Megalania, touch alien guts,
be a lighting technician, puppeteer the giant Peter Pan crocodile tail, plus loads more....

Limited time slots still available
