

Australia (city & regional) Tour!

'How to Make a Monster - the art and technology of animatronics' has limited spaces still available for the Australia 2010-12 Tour . With a 1 truck Regional Tour option now available smaller venues are excited to be hosting what has proven to be one of the most popular Australian exhibitions ever produced.

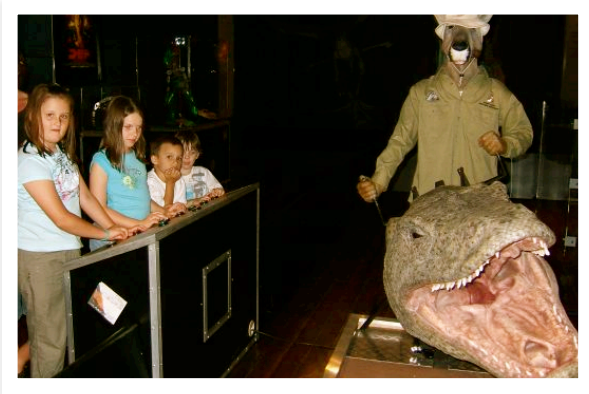

Fun for everyone!

Fascinating and informative, 'How to Make a Monster' is popular with people of all ages. Featuring the work of 1995 Visual Effects Academy Award winner for 'Babe' - John Cox and his Creature Workshop, it engages audiences in the arts of creative writing, creature design, story-boarding, computer effects, engineering, and much more. It's a 'behind the scenes' exploration of monster magic.

Be an on-set animatronics puppeteer!

Direct a dinosaur, touch the alien guts from 'Pitch Black', manipulate a Megalania, inspect 'Inspector Gadget's gadgets, puppeteer the giant crocodile from 'Peter Pan', be a lighting technician and do heaps of other cool stuff. Education package and activities programme available.

Don't miss out!

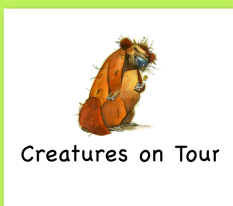

Extra regional dates may be available. To enquire call (07) 5564 9992 or email
